Founding:

Datto was founded in 2007
by Austin McChord.

About Datto

As the world's leading provider of IT solutions delivered by Managed Service Providers (MSPs), Datto believes there is no limit to what small and medium businesses can achieve with the right technology. Datto offers business continuity and disaster recovery, networking, business management, and file backup and sync solutions, and has created a one-of-a-kind ecosystem of partners that provide Datto solutions to half a million businesses across more than 130 countries. Since its founding in 2007, Datto has earned hundreds of awards for its rapid growth, product excellence, superior technical support, and for fostering an outstanding workplace.

Datto Solutions

Unified Continuity

Datto Continuity

Datto Continuity is a Business Continuity and Disaster Recovery (BCDR) solution built specifically for MSPs to keep their clients' businesses running in the wake of a disaster. With Datto, MSPs ensure their client's business is always on with an all-in-one solution that includes verified backups, restore options for any scenario, instant virtualization, and ransomware detection and recovery. Our market leading SIRIS is the first data protection platform that protects physical, virtual, and cloud infrastructure running on Windows, Mac, or Linux and can be deployed as an appliance, imaged, or virtual system.

Datto SaaS Protection for Office 365 and G Suite

Datto SaaS Protection is the leader in MSP-focused cloud-to-cloud backup, protecting essential business data generated in leading SaaS applications such as Microsoft Office 365 and G Suite. Automated backups and fast recovery are necessary to avoid costly data loss in the cloud. SaaS Protection gives MSPs the security and control they need to protect SMBs against data loss from internal threats like accidental or malicious deletion, external threats like ransomware, and application service outages.

Business Management

Professional Services Automation (PSA)

Datto Autotask PSA is a complete IT business management platform that delivers all of the mission-critical tools needed to run an IT managed services business. It's a reliable cloud-based platform that centralizes business operations, integrates with industry-leading remote monitoring and management systems, and enables quick, data-driven decisions.

Number of Employees:

1,500+

Remote Monitoring and Management (RMM)

Datto RMM is an easy, powerful, and 100% cloud-based remote monitoring and management (RMM) platform. It enables MSPs to securely manage their clients' IT environment with robust tools such as SNMP network monitoring, automated patch management, universal antivirus monitoring, and native remote control. With Datto RMM, MSPs proactively prevent issues, respond faster and deliver a higher quality of service resulting in more lucrative recurring revenue streams.

Networking

Networking for MSPs

Datto Networking is the most MSP-centric networking product lines in the world, delivering a complete lineup of wireless access points, managed switches, edge routers, and managed power devices. From monthly pricing that aligns with how MSPs sell their services, to lifetime warranties, to intuitive cloud-based multi-tenant management, Datto Networking is reinventing how MSPs do networking.

File Backup & Sync

Endpoint Backup

Endpoint Backup is a 100% cloud, Datto hosted, file and folder backup service designed to continuously backup business data. Endpoint Backup integrates with RMM and Datto's Autotask PSA for automated deployment, monitoring, and management of backups on customer endpoints. Endpoint Backup is SOC2 certified with rotating encryption keys.

File Sync & Share (FSS)

Workplace™ is a 100% cloud, Datto hosted, FSS solution that synchronizes data between the cloud and local devices, including servers, giving MSP clients the ability to collaborate anywhere, from any device. Alongside integrations with RMM and Datto's Autotask PSA to automate service management; powerful administration, reporting, and security capabilities keep critical business documents safe. Workplace is SOC2 certified with rotating encryption keys.
