All-in-one business continuity

Built to ensure small business environments are always on and resilient to disaster, Datto ALTO delivers a turnkey solution that includes hardware, software and cloud. Automatic backup verification, ransomware detection and flexible restore options on-prem and in the cloud ensure you're ready to recover from any scenario. With ALTO, you don't have to cobble together individual technologies to achieve complete business continuity. ALTO is backed by Datto's purpose-built, private disaster recovery cloud, enabling instant virtualization and failover with minimal configuration. Unified business continuity solutions save time, money and headaches. Every component of the ALTO stack is designed by Datto to work seamlessly together — from the appliance and backup agents to the Datto software platform and private Datto Cloud. One vendor, one stack, one predictable price.

Maximizing uptime

Going beyond backup and recovery of data, business continuity solutions save businesses by keeping them online in the face of otherwise devastating events, such as ransomware, natural disasters, network outages and costly human errors. ALTO's recovery tools are fit for any scenario and are designed to get businesses back to production fast. Backups are stored recovery-ready in the Datto Cloud; any snapshot can be used for restoration at the local site or virtualized in the Datto Cloud for seamless continuity with 1-Click Disaster Recovery.

Raising the bar for reliability

Reliability begins with knowing your backups are easily recoverable. Datto eliminates the guesswork by automatically verifying backups are bootable and ransomware-free for 100% recovery confidence. Backups are automatically replicated and stored in the proven Datto Cloud; choose from 1-year, 7-year or infinite retention for your cloud backups.

No training required

Datto ALTO is built to save you time without cutting corners by simplifying and automating complex workflows. Delivered as a turnkey solution, ALTO works right out of the box with minimal setup and configuration required. Managed from the intuitive Datto Partner Portal, no certification is required, with training available via the portal as needed The Partner Portal provides a single pane of glass for you to quickly and easily manage all Datto products and services. ALTO easily integrates with major RMM, PSA and IT documentation solutions, streamlining workflows for efficient management and seamless end-user support.

More than a product

Datto's offerings are centered around meeting the business continuity needs of our partners and customers. That means going beyond simply offering a product for sale. Datto partners have access to a number of free services, including training, marketing automation, 24/7/365 direct-to-tech support, data seeding, DR testing and more. With a complete solution, Datto partners can be more efficient and deliver business continuity with confidence.

Key features

Supported OS	• Support for Windows Server, Windows and Linux systems
Recovery operations	• Granular file/folder restore, image export, bare metal recovery, instant virtualization in the Datto Cloud.
Ransomware detection	• Proactive detection and alerting of suspicious file patterns characteristic of ransomware infection.
Screenshot verification	• Daily, automatic proof that backups are healthy and bootable.
Application verification	• Validation of application recoverability by ensuring services start correctly upon restore.
One-screen management	• Manage all Datto appliances from a single pane of glass.
1-Click Disaster Recovery	• Effortlessly clone previously tested VM resource and networking configurations for disaster recovery in the Datto Cloud.
1-Click DR Testing	• Easily clone VM resource and network configurations for DR testing in the Datto Cloud.

Hardware specifications

Storage	2 TB NVMe m.2
RAID	-
OS Drive	256 GB m.2
RAM	8 GB DDR4
CPU	Celeron 7305 (5c/6t)
NIC	Intel 1GbE
Video Out	1x HDMI 2x Display Port
Chassis	Micro Desktop
Warranty	Datto 3-Year Warranty
