

Never Lose Critical Files to a Ransomware Attack

Enhance business continuity and reduce downtime with Ransomware Rollback

With one click, instantly revert files to their original state after a ransomware attack and ensure normal business operations are up and running without any loss of time, money or data.

- Go back in time with Ransomware Rollback and quickly recover ransomware-encrypted files, ensuring business operations continue to run as if nothing ever happened.

Quick and efficient file recovery

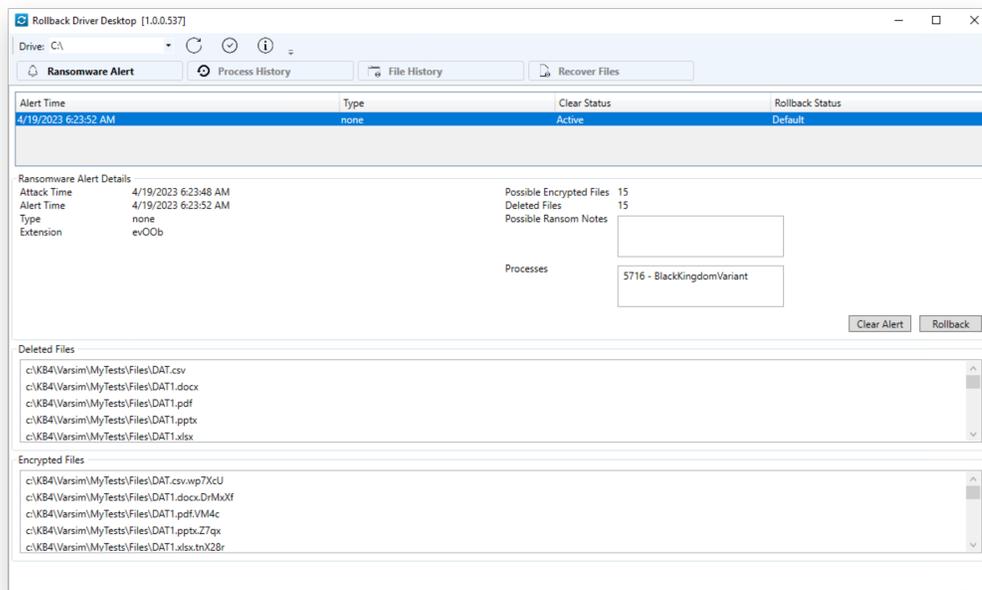

- By tracking changes to users' files in real time, Ransomware Rollback provides you with the ability to restore files to their original state, enhancing your resilience against cyberattacks.
- Ransomware Rollback Desktop Application is easily and instantly installed on managed devices that have Datto EDR and Ransomware Detection, improving your security posture right away.
- Ransomware Rollback allows you to revert multiple files at once, ensuring data remains safe no matter the scale of your organization.
- Easily monitor tracked changes through the Rollback Desktop Application. Access all the reverted files and view the file name, file size, update time and date at a glance.

Getting Started

Ransomware Rollback is available as part of Ransomware Detection, a free add-on to those who subscribe to Datto EDR.

About Datto EDR and Ransomware Detection

Datto EDR is an easy to use, advanced endpoint detection and response solution that detects evasive cyberthreats quickly, enabling timely response and remediation before damage is done.

[Datto EDR's Ransomware Detection](#) monitors for the existence of crypto-ransomware on endpoints by using proprietary behavioral analysis of files.

Strong Security Made Simple

Once ransomware is detected, Datto EDR alerts you, isolates the device and attempts to stop the ransomware processes to keep the infection from spreading. When paired with Ransomware Rollback, Ransomware Detection with Datto EDR offers a powerful early warning and rapid recovery system against malware.
