

From chaos to control: Power your day with the right endpoint tools

Let's be real. Working in IT can sometimes feel like a fire drill. When you're stuck with the wrong tools, it's chaos. Alerts are flying, tasks are piling up, and there's no time to catch your breath. The right tools bring order, clarity, and control. They can be the difference between burning out and staying balanced. Here's how Datto RMM and EDR helps make that happen every day.

Datto

Other tools

8:30am: Commute to work

"I gotta cut loose, footloose, kick off your Sunday shoes"

"Working on the train again. So much for a quiet start. Ugh"

9:00am: Clock in

"Morning guys. Love a quiet morning!"

"1 done, 10 more to go. I'm drowning here!"

10:30am: Threat alert

"An active threat has been identified on one of our systems. Taking immediate action to contain it."

"Our endpoints just got hit! How are we gonna fix this?"

required

10:45am: Progress check

"Automation activated! With **EDR** isolating the threat and **RMM** running the fix, containment's already in motion."

"With zero integration in place... this is gonna take all day."

11:00am: Progress update

"Thanks to **Datto's integrated endpoint security** and **smart malware detection**, we avoided a crisis. No wasted time, no unnecessary stress."

"I'm barely making a dent in this."

11:30am: Project time

Alright, locking in on the priority project now. Should have the report ready by the end of the day.

Between following up with vendors and everything piling up, I can't catch a break.

1:00pm: Lunch break

I watched the French Open yesterday. Alcaraz and Sinner delivered the performance of a lifetime.

With no proper reporting and no visibility, this is spiraling out of control. I need backup!

1:30 pm: Midday progress

"New alert! Looks like an unusual file activity with systems slowing down across multiple endpoints. Could be a possible ransomware threat. Need to run a deeper check right away."

Another alert! Man, I can't keep up... this is getting out of hand.

2:30pm: Midday update

Bam! Another one bites the dust. With **99.99%** uptime and **99.62%** early detection, Datto's relentless security never misses a beat.

Everything's breaking at once!

4:00pm: Wrapping up work

"The report and the findings for the project are looking sharp. Good day indeed."

I'm completely burnt out and exhausted.

5:00pm: Clock out

Alright guys, see you tomorrow.

This is never-ending. Looks like I'm stuck here late again.

With Datto EDR and RMM, you can eliminate downtime and improve overall performance with powerful automation and smart endpoint security, so your team stays focused and in control.
