

Datto BCDR & Datto Secure Edge integration

Instant connectivity to the Datto DR Cloud

At Datto, we understand that every second counts in disaster recovery (DR). Every passing moment after an IT disruption leads to operational downtime, financial loss and reputational damage. That’s why we’ve introduced a powerful integration between Datto BCDR and Datto Secure Edge that reduces complexity and accelerates recovery when it matters most.

OneDeploy Secure Edge for Datto BCDR automates the critical initial steps in DR and eliminates the hassles that slow down the recovery process. Traditionally, admins manually configure VPN access to a cloud DR environment, delaying time-to-recovery and introducing risk of user error. Admins are required to create OpenVPN tunnels, download and distribute config files, and test and troubleshoot on the fly. This is a time-intensive and frustrating process, especially for larger or more complex IT environments.

This integration between Datto BCDR and Datto Secure Edge automates the process to connect downstream users to the recovery environment. It enables admins to automatically connect the Secure Edge gateway(s) to the cloud DR environment directly from the Datto Recovery Launchpad. With two clicks, an IPsec tunnel is created to the Secure Edge virtual gateway (hosted in AWS) using Datto’s predefined and fully managed configuration parameters.

The result? Faster RTO, lower risk and a smoother, simpler recovery experience.

Integration highlights

Say goodbye to configuring, downloading and editing VPN files.

Faster recovery, automatically:

Cloud recovery networking is now hands-free. With this automated setup, you can get connected in less time.

Fewer errors, less stress:

Eliminate manual VPN setup and reduce risk. Spin up DR assets in the Datto BCDR Cloud and quickly cross-connect to the Secure Edge service.

No config files, no confusion:

End users can easily connect to the Datto BCDR Cloud without changing VPN settings on their devices.

All-in-one recovery workflow:

Manage cloud connectivity directly from the Datto Recovery Launchpad. If the users are on Secure Edge, they're already in.

Datto BCDR makes recovery easy. OneDeploy makes it instant. Want to see it in action?
