

Datto Backup for Microsoft Entra ID

Business continuity and disaster recovery (BCDR) solution purpose-built for Microsoft Entra ID.

Datto Backup for Microsoft Entra ID is designed from the ground up to secure, manage and rapidly restore your Microsoft Entra ID (formerly Azure Active Directory) data from misconfigurations, outages and cyberthreats.

With support for multitenant management, seamless integration and fast recovery, it minimizes downtime and ensures your or your client's business stays operational no

matter what. Whether you're facing accidental deletions, misconfigurations or cyberthreats, you get resilient Microsoft Entra ID protection, so identity authentication, access control and day-to-day operations keep moving without a hitch.

Microsoft Entra ID runs authentication — but backup is still your job

Microsoft Entra ID is the critical control plane of today's IT environments. It's the vital link connecting users to Microsoft 365, other third-party SaaS applications, Azure services and internal platforms. Every login request, access approval and privilege escalation flows through it.

However, your Microsoft Entra ID data isn't always guaranteed to be available when you need it most. Under Microsoft's shared responsibility model, while they secure the infrastructure, the responsibility to protect and back up your data, including Microsoft Entra ID, falls squarely on you. Meanwhile, identity threats are also escalating, with sophisticated account takeover (ATO) campaigns and relentless password-based attacks increasingly targeting Microsoft Entra ID. In a recent example, one large-scale ATO campaign targeted over 80,000 Microsoft Entra ID accounts across hundreds of organizations' cloud tenants.

As Microsoft Entra ID grows in prominence as a business-critical system, and threats intensify, you can't really rely on native protections that leave too much to chance. And that's where Datto Backup for Microsoft Entra ID comes in. It's the safety net for your Microsoft Entra ID data, ensuring that when disruptions strike, you can bounce back fast and keep business moving.

Did you know?

Microsoft reports that more than 600 million identity attacks target Microsoft Entra ID every day.

Why Datto Backup for Microsoft Entra ID?

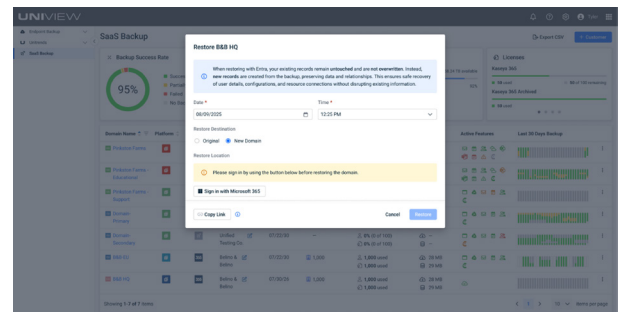

Whether it's accidental deletions, outages, misconfigurations or cyberthreats, IT disruptions often strike without warning. In a world where identity and access management is the backbone of secure operations and downtime is not an option, Datto Backup for Microsoft Entra ID lets you back up, protect and restore Microsoft Entra ID data with confidence.

Backup you can trust

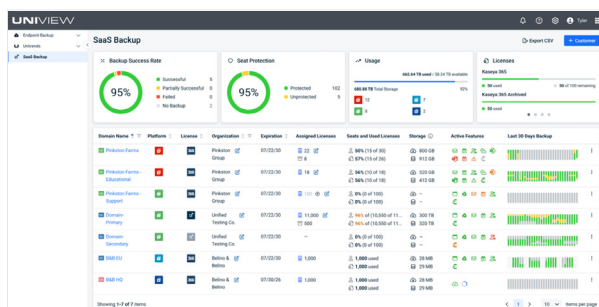

- » **Automated daily protection:** Get IT peace of mind with up to six automated backups every day, capturing Microsoft Entra ID data approximately every four hours without interruption.
- » **Fast, simple onboarding:** Protect critical identity data in minutes with a streamlined, click-through setup process.
- » **Intuitive management:** Monitor licenses, track profitability and view backup status from a single, easy-to-use portal environments instantly.
- » **Effortless scalability:** Extend protection across multiple tenants with set-and-forget backups, built-in versioning and proactive alerts.

Recovery when you need it

- » **Point-in-time recovery:** Restore data to an exact moment before deletion, misconfiguration or attack occurred.
- » **Cross-user restore:** Move data from one Microsoft Entra ID account to another quickly and with ease.
- » **Restore to new tenant:** Speed up recovery by restoring data directly to a fresh tenant, avoiding slow manual rebuilds and keeping operations running even during security incidents.
- » **Unified M365 Exchange recovery:** Integrate with Datto SaaS Protection to restore identity and user mailboxes, calendars and contacts in a single workflow, accelerating disaster recovery and reducing operational strain.

Restore Microsoft Entra ID data with ease

Manage backups across all your SaaS environments from one centralized portal

Pricing you can plan for

- » **Simple per-user pricing:** Deploy licenses across users and easily reassign them as needs change.
- » **Volume-based savings:** Unlock aggregated discounts based on the total number of licenses purchased.

Compliance you can rely on

- » **Built-in compliance support:** Meet regulatory requirements with backups aligned to SOC 1/SSAE 16 and SOC 2 Type II standards while supporting Health Insurance Portability and Accountability Act (HIPAA) and General Data Protection Regulation (GDPR) needs.
- » **Infinite retention:** Keep your Microsoft Entra ID data for as long as you need it with unlimited data retention.

Technical backup features

Protected objects	Users, groups, directory roles, service principals, devices, contacts, applications, administrative units
Automated backup	Automated daily point-in-time backups begin after initial ingest
Cloud storage regions	United States, Canada, UK, Ireland, Australia, South Africa
Storage	Unlimited
Retention	Infinite data retention
Restore functions	Original tenant, new tenant, Unified M365 Exchange recovery
Security	<ul style="list-style-type: none">» Multifactor authentication (MFA) to management portal» Role-based access control (RBAC)» Single sign-on (SSO) from KaseyaOne Portal
Backup encryption	<ul style="list-style-type: none">» 256-bit AES at-rest» TLS encryption in-flight
Alerts	<ul style="list-style-type: none">» PSA ticketing» Email alerts
Workflow integrations	<ul style="list-style-type: none">» PSA alerts & automated ticketing (Autotask, Kaseya BMS)» myITprocess» Compliance Manager GRC

Secure your Microsoft Entra ID with confidence and ease

Threats targeting your identity data are escalating at an unprecedented pace, and leaving Microsoft Entra ID unprotected — or relying solely on limited native tools — puts your or your clients' business at serious risk. With Datto Backup for Microsoft Entra ID, you can deploy protection in seconds and restore users in just a few clicks. Beyond that, Datto makes it simple to manage all your backups — across SaaS, appliances and endpoints — from a single, unified portal, so you never waste time switching between platforms. The result is effortless continuity, making it easy to keep operations running no matter what comes your way.
