

# Raising the Bar on Industry Standards with Datto EDR and Datto AV

Malware attacks like ransomware have been consistently increasing year-over-year. As the danger grows, so does the need for IT professionals to have security solutions that can combat these threats today and tomorrow. Miercom, a global leader in independent cybersecurity testing, found that Datto EDR and AV far surpassed the industry standard in malware detection in their latest report. Here are the top four reasons these solutions are superior to others.

## 01 Proven Efficacy: 99.62% Malware Detection Rate

Datto AV and Datto EDR offer an impressive 99.62% efficacy rate in detecting and neutralizing all malware threats, **surpassing the industry average of 73%.**

## 02 98% Detection Rate for Zero-Day Threats

The current **industry average of detecting only 45%** leaves businesses vulnerable to the consequences of a successful cyber-attack.

## 03 24/7 Support and Simple Onboarding

Datto offers unparalleled support services that consist of fast response times and a dedicated account manager we help our customers get the most of Datto EDR and AV.

## 04 Independently Validated Against Advanced Threats

As threats become more sophisticated, having tools in place to easily and accurately detect and respond is essential. Miercom specifically called out our ability to detect and mitigate advanced evasive, advanced persistent, polymorphic, and fileless threats.

Don't settle for just "good enough" protection from devastating malware like ransomware and unpredictable Zero-Day threats. See for yourself how Datto EDR and Datto AV are raising the bar on security and maximizing your protection without breaking the bank.
