

Datto Workplace

Datto Workplace, an enterprise-grade File Sync and Share solution, enables MSPs to centrally configure, manage, and monitor their client's critical business data. Built for business, Datto Workplace provides a seamless collaboration platform to clients, for every file, from every device. Managed Service Providers have complete control over critical business data to support productive and growing SMBs. Client's can work anytime, anywhere without putting their security and efficiency at risk.

Complete Governance

Sophisticated Administrative Controls
Datto Workplace enables customizable user and group configurations and policy controls, allowing the right users to have the proper access. Nothing more and nothing less. Integration with Active Directory and Single-Sign on automate on and offboarding.

Workplace Manager

Built for the MSP, Datto Workplace includes an online portal that allows for storage management, provisioning, and administration across all clients. Comprehensive reporting on system activity allows for monitoring usage and aligning on policies and regulations.

Secure Management

Security and Compliance
HIPAA and SOC 2 Compliance, 256-bit encryption, and 99.99% uptime keeps business data safe. A geo-redundant data center infrastructure in the US, Europe, Australia and Canada means your data does not need to leave the region.

Proactive Threat Detection

When it comes to Ransomware, incoming threats are automatically detected, tracked, and reverted back to safety without disruption or loss of productivity.

Seamless Collaboration

Streamline Workflows

Datto Workplace works across core business tools like O365 and G Suite, so when file locations change, productivity doesn't. Sophisticated internal and external sharing features enable efficient collaboration with anyone, from anywhere.

Flexible Accessibility

Access via server, or in the cloud with desktop, online, or mobile to optimize performance without compromising convenience. Workplace Server supports a hybrid model, enabling real-time access outside the LAN without the need for a VPN.
