# Puppet Protects Itself from Data Loss with Backupify

backupify

a datto company

Puppet software helps sysadmins automate the configuration and ongoing management of machines and the software running on them, so they can spend less time fighting fires and more time helping their organizations deploy great software.

**WITH BACKUPIFY, I HAVE A SINGLE PANE OF GLASS FOR MANAGING ALL OF MY BACKUPS, AND I CAN IMMEDIATELY SEE WHO IS GETTING BACKED UP, HOW MUCH DATA IS BEING BACKED UP, AND SEARCH FOR BACKUPS. I MANAGE A NUMBER OF DIFFERENT IT SYSTEMS, AND THIS SIMPLICITY IS KEY. I CAN GO TO ONE PLACE TO SEE EVERYTHING AND QUICKLY GET THE INFORMATION I NEED. "**

**Nick Cunningham,**  
IT Manager

## Puppet Scales Easily with Cloud Apps

Puppet uses Backupify for G Suite to support its 300+ employees. As Puppet continues to grow rapidly, utilizing cloud apps helps them easily scale as they add new employees, deliver a repeatable experience across the organization, and give employees fast access to data regardless of physical location. Puppet relies on all G Suite applications, and protecting that data is of utmost importance. Puppet IT manager Nick Cunningham says, "I've managed end-user support in one way or another for over 10 years. If there's one thing you always need, it's backup."

## Backupify Offers a Single Pane of Glass

"Backing up your data is critical," Nick says. "It only takes learning the lesson the hard way once to realize this. With Backupify, I have a single pane of glass for managing all of my backups, and I can immediately see who is getting backed up, how much data is being backed up, and search for backups. I manage a number of different IT systems, and this simplicity is key. I can go to one place to see everything and quickly get the information I need."

## Backupify Saves Hours of Time

"Offboarding an employee can be a time-consuming task for IT, but Backupify makes it easier," Nick says. "When an employee leaves the company, I can pull a backup of their entire G Suite account onto a thumb drive in minutes for their manager or our HR team. Without Backupify, the process would include re-activating an account, setting up a new password, and searching through their data; if something had been deleted by the employee, then it would have been gone forever. With Backupify, I don't need to worry about losing data, and it's the difference between something taking hours or minutes of my time."

## About Backupify

Backupify, a Datto company, is the leader in cloud-to-cloud backup, enabling enterprises to extend data protection and accessibility best practices to the cloud. Backupify gives IT professionals the security and control they need against data loss from user errors, external threats, and service failures.
