

# SECURE YOUR ORGANIZATION WITH DATTO'S COMPREHENSIVE MDR SOLUTION

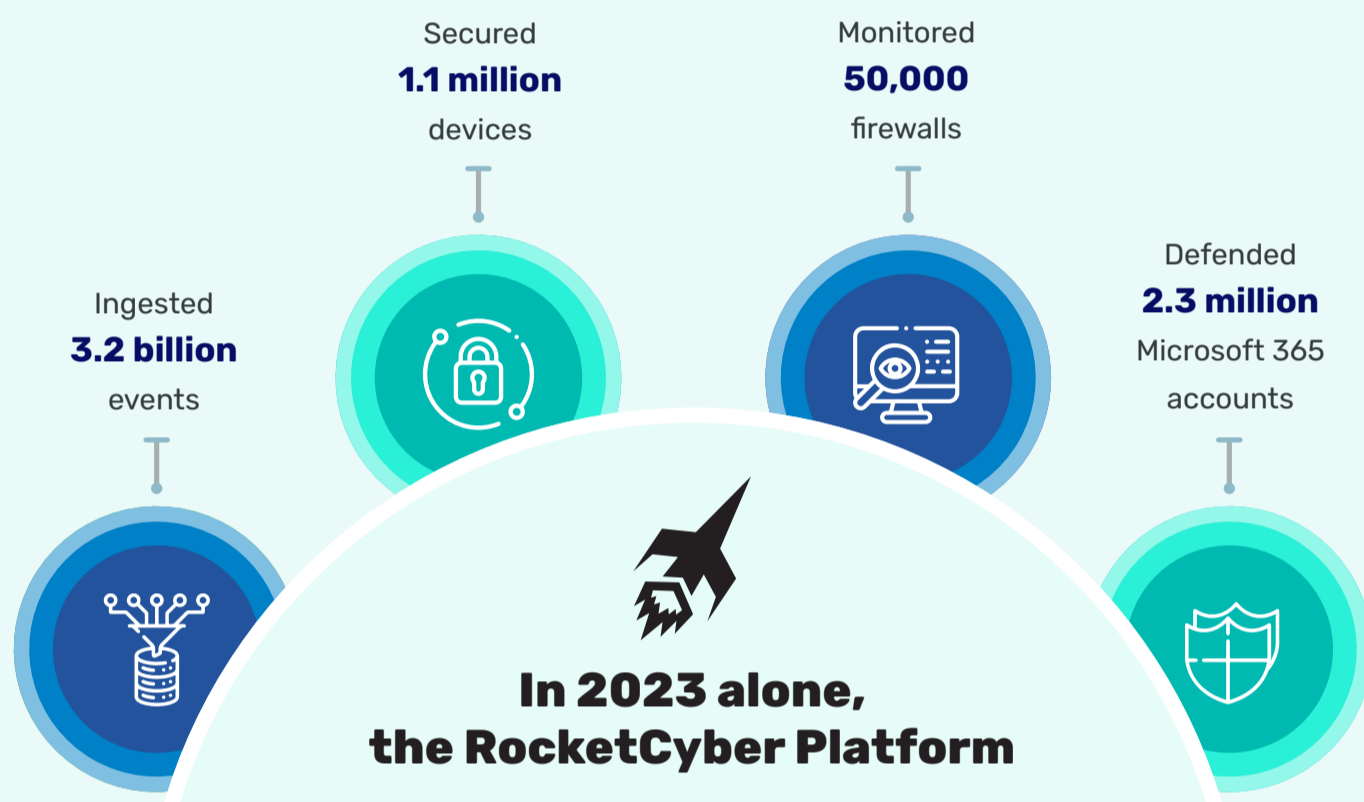

Cyberthreats are getting smarter, and no single tool can catch everything. That's why a layered security approach is key. By leveraging Datto Managed SOC's robust managed detection and response (MDR) capabilities, you get around-the-clock threat monitoring and response.

Pair that with Datto endpoint detection and response (EDR) to catch suspicious activity on endpoints and Datto AV to block known malware, and you've got a security stack that creates the kind of protection modern businesses need.

Here's how Datto Managed SOC, Datto EDR and Datto AV seamlessly complement each other to provide unparalleled security.

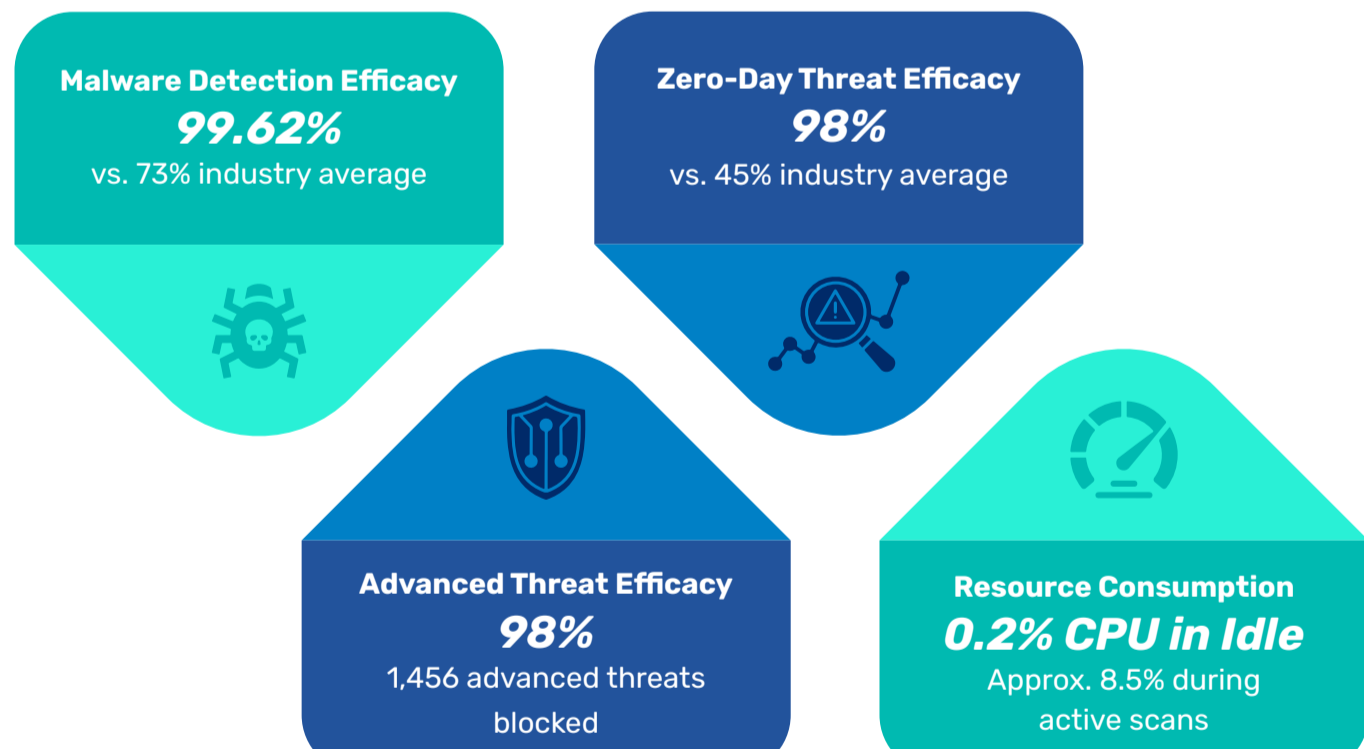

## COMPREHENSIVE VISIBILITY WITH THE XDR PLATFORM

Datto Managed SOC, powered by RocketCyber XDR, gives you full visibility across endpoints, networks and the cloud. It pulls in data from multiple security tools to deliver centralized alerts and advanced, layered threat protection.

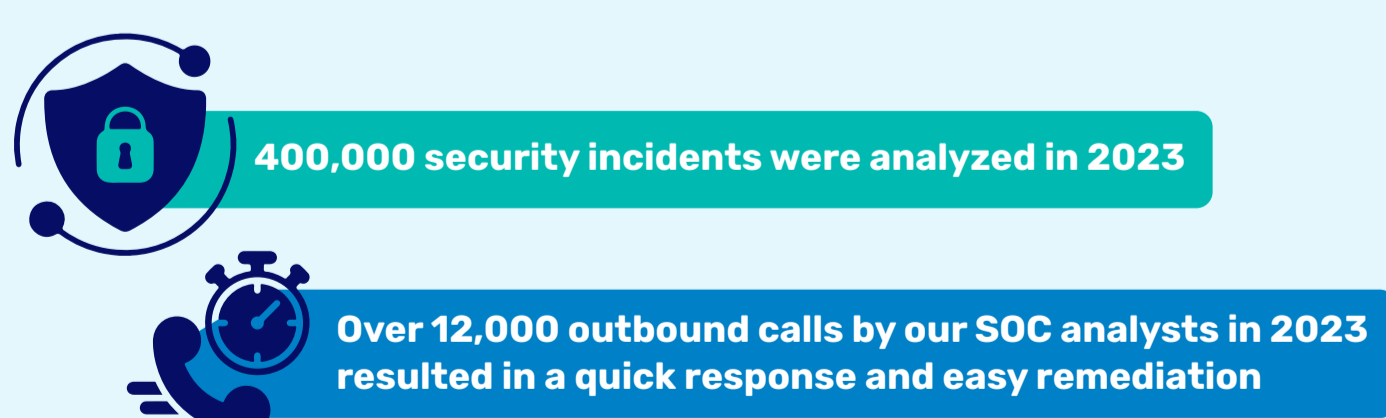

## BETTER TOGETHER FOR DEFENSE-IN-DEPTH

Datto AV and Datto EDR seamlessly combine with Datto Managed SOC. They underwent rigorous review by Miercom, a global leader in cybersecurity testing, setting a new industry standard.<sup>1</sup>

## SUPPORT FROM EXPERT CYBERSECURITY ANALYSTS

The Datto Managed SOC team monitors alerts from RocketCyber, Datto EDR, Datto AV, email security and firewalls, keeping your business safe and reducing false positives through human evaluation.

## EXPERIENCE SECURITY YOU CAN COUNT ON

Don't settle for patchy protection. Datto's security solutions are built to work together, giving IT teams strong, reliable defenses without added complexity. Protect more with less effort using Datto Managed SOC, EDR and AV.

**MAKE SECURITY SIMPLER**
